PROFESSIONAL SUMMARY

Motivated AI undergraduate (Delta University, 2022 2027) and commercial Software Engineer at NOVIQ startup (2026). Builds full-stack MERN products end to end secure JWT REST APIs, MongoDB architectures, cinematic responsive interfaces and ships ML-powered features with Python / Scikit-Learn (Random Forest, SVC). English B2, Arabic native.

EXPERIENCE

Software Engineer NOVIQ (Startup), Egypt | 2026

- " Built responsive web apps with React.js front-ends and Node.js backend services.
- " Engineered secure RESTful APIs with JWT authentication and role authorization.
- " Architected full CRUD systems for user records, registration, and activity logs.
- " Delivered modern cinematic UI/UX workflows; integrated ML inference microservices.

AI & Full-Stack Researcher Delta University, Faculty of AI | 2022 Present

- " Custom ML classifiers with Random Forest and Support Vector Classifiers (SVC).
- " Cross-platform Flutter apps with offline caching for heritage tourism.
- " Led collaborative student teams for simulation and algorithmic modeling.

EDUCATION

B.Sc. in Artificial Intelligence (Expected 2027) Delta University for Science and Technology, Gamasa
Faculty of Artificial Intelligence. Focus: intelligent systems, ML architectures, algorithms, modern SWE.

TECHNICAL SKILLS

Frontend: React.js " JavaScript (ES6+) " HTML5 / CSS3 " Tailwind CSS " Responsive UI/UX
Backend: Node.js " Express " RESTful APIs " JWT Auth & Security " MongoDB " CRUD design
AI / Mobile: Python " Scikit-Learn (RF / SVC) " Data Preprocessing " Flutter (Dart)
Tools: Git & GitHub " Postman / API Testing " VS Code " Team Leadership

LANGUAGES

Arabic (Native) " English (B2 Working Proficiency)
